

All my headbands are custom made to order. I ask for a few head measurements to make sure that the headband is a good fit.

1. The head size - measure around the head where the headband will sit.

2. Ear to Ear - if you need 2 pockets then measure from the top of 1 ear round the front (where the headband will sit) of the head to the top of the other ear.

I also ask for the hearing aid sizes so that the pockets are the correct size
